

Product	United Foam PC Primer 195	
Product Category	<p>PC Primer is a modified, non-crystallizing epoxy resin. In combination with hardener, this low-viscous product based on bisphenol A/F.</p> <p>PC Primer are used for primers or coating on problematic wet or moist substrates and for high-solid coating for heavy-duty corrosion protection</p>	
General information	Component Base and component hardener is hazardous to health, so safety precautions in the safety data sheet must be followed.	
Physical Data	<u>Component RESIN</u>	<u>Component Hardener</u>
Equivalent weight g/Eq	193	115
VISCOSITY mPa(cp) by/23°	800-1000	900 - 1400
Mixing Ratio Weight	100	60
Storage – closed drums (Keep away heat and humidity)	6-9 Month.	6-9 Month.
Processing Characteristics at 20° (can be varied)	<p>Dry time: 6-8 H.</p> <p>Recoat time: when dry and 24 hours from here</p>	
25° (can be varied)	<p>Dry time: 2-4 H.</p> <p>Recoat time: when dry and 24 hours from here</p>	
Appearance	Clear, yellow liquid	Clear, dark yellow
CE-Marking	No
